

Data / Fuel for Digital Business

From data engineering to machine learning and automation – get insights from your data to increase your business performance and value.

Customer Reviews / Testimonials

John Newton said – “I once was lost but now I’m found, I was blind but now I see.” This quotation in a way reflects **the change brought by Univio to House of Champagne in the area of acquired data and its analysis** as well as the optimization of purchasing, sales and logistics processes.

Maciej Soporek
CEO, House of Champagne

Adopt a Data-Driven Mindset / We Can Help You

Without a solid data management strategy, **petabytes of data are unused, leading to lost market opportunities.** Discover effective solutions to improve your company's results. Let us show you how and which data to obtain, collect and process.

Identify new business opportunities

Improve sales and marketing efficiency

Realize your customers purchasing potential

Increase demand

Optimize your supply chain

Improve production output

Data Analytics & Machine Learning

Gain deeper insight into your operations to make better, more informed decisions. Automate complex tasks and processes through intelligent learning algorithms.

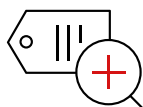

Lots of Data / No Conclusion?

Thanks to the advanced analytics solutions you will **turn the data into ready-made and actionable conclusions and recommendations.** Use information from sales transactions, analyze the customer path, production capacity, market trends and your competition **to influence the demand.** Tailor your tactics to each customer - offer the right products, optimal price and dedicated promotions.
